2019 Coastal Resilient Internship

Moffatt & Nichol, in partnership with Virginia Sea Grant (VASG), is pleased to announce a paid summer internship focused on planning and engineering resilient coastal communities. The internship is seeking to train remarkable students to become leaders in innovative, pre-disaster, resiliency design strategies. The selected intern will be given the opportunity to participate in planning and engineering projects that are making our nation's coastal cities more resilient. Moffatt & Nichol will provide exposure to leading practices and practitioners in the field relevant to the intern's area of study.

ELIGIBILITY & LOCATION

The internship is open to full-time undergraduate and graduate students with research experience or training in areas including, but not limited to: coastal engineering, stormwater management, resilient design, and/or coastal flooding adaptation strategies. One selected intern will work alongside a mentor at Moffatt & Nichol's Norfolk, VA office.

The internship partners are committed to building inclusive research, extension, communication and education programs that serve people with diverse backgrounds, circumstances, needs, perspectives, and ways of thinking. Diversity includes, but is not limited to, age, race, ethnicity, nationality, gender identity, sexual orientation, disability and/or health status, religion, veteran status, geographic origin and socio-economic status. Applicants enrolled at a Virginia institution and those with prior internship experience are encouraged to apply.

INTERNSHIP PARTNERS

Moffatt & Nichol is a global infrastructure advisory firm working from 36 offices and 7 countries. We provide practical solutions to clients in the marine terminal, transportation, energy, environmental, federal, and urban development markets around the world. We are a multidiscipline professional services firm with specialized expertise in structural, coastal, and civil engineering; environmental sciences; economics analysis; inspection and rehabilitation; and program management solutions.

Virginia Sea Grant's mission is to enhance the ecological, economic, and social sustainability of coastal and ocean communities and the ecosystem services they depend upon through university-based research, extension, education, and communication that provide science-based information to decision makers. VASG is a seven-university partnership headquartered at William & Mary's Virginia Institute of Marine Science, and composed of the University of Virginia, Virginia Tech, and George Mason, James Madison, Old Dominion, and Virginia Commonwealth Universities. VASG serves the Commonwealth of Virginia, the region, and the nation.
